

AIRBAG MAN LIGHT VEHICLE APPLICATION GUIDE 1st FEBRUARY 2021

RR = Leaf Helper Airbags to assist leaf springs, rubber convoluted bellows fitted between the chassis and axle / leaf springs.

LU = Non-Air Leaf Helper spring to assist leaf springs, microcellular polyurethane bumper spring fitted between the chassis and axle / leaf springs.

CR = Coil Helper Airbags to assist coil springs, polyurethane bellows fitted inside the coil springs.

CRHP = Coil-Rite High Pressure airbags for vehicles being loaded to up to or near Maximum Allowable Loads, Airbag Man's unique high pressure sleeve up-grade for heavy duty coil assist applications.

OA = Coil Replacement Full air suspension conversion for vehicles with coil or leaf springs, the coil springs are removed and replaced with heavy duty airbags that provide full adjustability for raising and lowering.

Blue Highlight = FRONT KIT

ND = No-Drill Airbag Mounts, holes may be required for inflation/deflation valves

Ph: 1800 air bag (1800 247 224) or 07 3889 6556

Web: airbagman.com.au

email: info@airbagman.com.au

Vehicle is not listed? please contact Airbag Man, or look up vehicle on Airbag Man web site

Foot Note 1: Some vehicles may require certification for legal fitment of Airbag Man products, please check with regulatory authorities regarding this before purchase or fitment of Airbag Man products, please contact Airbag Man for further details, note this is generally only applicable to OA product and for Heavy vehicle product.

Where Intelliride air controls are included these will assist with certification requirements, and have specific install requirements, contact Airbag Man for information.

Foot Note 2: Kits with IntelliRide air controls included have pre-programmed parameters for the particular vehicle and are ready for approval by all State and Territory authorities when installed to the jurisdiction Engineers requirements. Approvals are issued by applicable Engineers with assistance as required by Airbag Man.

Foot Note 3: Airbag Man has made every attempt to assure that the air helper spring kits listed will properly fit. Chassis modifications made by others that effect suspension dimensions may not provide conditions for proper fit. Due to new model introductions and manufacturer changes, Airbag Man reserves the right to make changes to the list without notification.

Foot Note 4: Some manufacturers use brake proportioning valves to adjust braking force as a function of chassis to axle distance. If you modify your suspension it effects the function of this valve. We suggest that you check with your dealer on proper treatment of this device prior to installation of airbag kits.

Foot Note 5: Full Droop measurements are taken by jacking or lifting the vehicle so that the suspension with all components connected, is at its hanging limit, then measure the gap directly above the centre bolt, from the bottom of the chassis rail (or other nominated position) to the top of the axle or leaf, whichever is closer. Ensure the vehicle is jacked or lifted using suitable safe equipment, and using correct practices. Bolt in packers are available for many applications if a lift or measurement requires a different measurement to those listed.

IF A Raised LISTING IS SHOWN, IT IS ASSUMED THAT THE VEHICLE HAS/IS BEING Raised, AND OUR LISTED KIT IS DESIGNED TO SUIT THE NOMINATED SUSPENSION				Year	KIT NUMBER	RRP AU\$	HP KIT NUMBER	RRP AU\$	Notes	Time Guide	Note: Time Guide is average fitting time for an experienced fitter in a well equipped workshop.
